### Environmental Planning and Assessment (Savings and Transitional) Amendment (Demolition) Regulation 2002

under the

Environmental Planning and Assessment Act 1979

Her Excellency the Governor, with the advice of the Executive Council, has made the following Regulation under the *Environmental Planning and Assessment Act 1979*.

ANDREW REFSHAUGE, M.P.,  
Minister for Planning

#### Explanatory note

On the commencement of the *Environmental Planning and Assessment Amendment Act 1997*, demolition became one component of the definition of **development**, rather than (as had previously been the case) a separate activity that could be controlled only if an environmental planning instrument expressly so provided. Prior to that commencement, the principal legislation that controlled demolition was the *Local Government Act 1993*. The inadvertent prohibition of demolition as a consequence of the extension of the definition of **development** was prevented by clause 29 of the *Environmental Planning and Assessment (Savings and Transitional) Regulation 1998*. Clause 29 was expressed to expire on 1 July 2000 (later extended to 1 July 2001), by which time it was intended that all environmental planning instruments that, but for that clause, would prohibit demolition would, in appropriate cases, be amended to remove that prohibition. Appropriate amendments to three environmental planning instruments applying to land in the Gosford local government area have yet to be made.

The object of this Regulation is to temporarily revive the effect of clause 29, in relation only to demolition in certain parts of Gosford, so as to enable demolition to be carried out (with development consent) pending the commencement of an environmental planning instrument that achieves a more permanent effect.

This Regulation is made under the *Environmental Planning and Assessment Act 1979*, including section 157 (the general power to make regulations) and clause 1 of Schedule 6.

### 2 Aims of plan

- (1) This plan aims:
  - (a) to rezone the land to which this plan applies from the Special Recreation “C” Zone to the Residential “A” Zone under *Port Stephens Local Environmental Plan 2000 (the 2000 plan)* to enable the development of the disused swimming pool for residential purposes, and
  - (b) to reclassify the subject land from community land to operational land within the meaning of the *Local Government Act 1993 (the 1993 Act)* to enable Port Stephens Council to dispose of the land as it is surplus to the Council’s needs.
- (2) This plan incidentally makes more extensive provisions in the 2000 plan for the classification or reclassification of public land as operational land as a consequence of major changes made to the statutory scheme in section 30 (Reclassification of community land as operational) of the 1993 Act:
  - (a) by replacing clause 43 of and Schedule 1 to the 2000 plan, and
  - (b) by omitting in the new clause matter in the existing clause relating to the classification or reclassification of public land as community land.

### CONTAMINATED LAND MANAGEMENT ACT 1997

#### Section 21

#### Declaration Number 21020

THE Environment Protection Authority (EPA) declares the following land to be a remediation site under the Contaminated Land Management Act 1997 ("the Act"):

#### 1. Land to which this declaration applies ("the site")

- Lots 1 and 2 in DP874874 (formerly Portions 169 and 138 in DP 755552), located at Hillside Drive, Urunga in the local government area of Bellingen (part of which is commonly known as the former Antimony Crushing Plant); and
- Crown land known as Lot 253 in DP46013 (formerly Portion 209, Shire of Bellingen, Parish of Newry, County of Raleigh), Urunga.

#### 2. Nature of the substances causing the contamination ("the contaminants"):

Antimony, arsenic, copper, lead and mercury in the soil on the site and in sediments in the wetland and drainage channel, which is located on the site.

#### 3. Nature of harm that the substance may cause:

The EPA has considered the matters in s.9 of the Act and has found that the site is contaminated with the contaminants listed above in such a way as to present a significant risk of harm to human health and the environment. In particular, the EPA has found that:

- Harm has occurred as indicated by dying Melaleuca trees on the site;
- Concentrations of lead, arsenic and mercury on the site exceed the relevant human health based criteria for areas zoned for residential use;
- Concentrations of arsenic, copper and mercury on the site significantly exceed the relevant phytotoxicity based criteria;
- Concentrations of antimony, arsenic, copper, lead and mercury in surface and groundwater on the site significantly exceed the ANZECC water quality criteria for the protection of aquatic ecosystems;
- Contaminants appear to have migrated off the site via groundwater and through surface erosion and been deposited as sediments in Station Creek.

There is a significant risk that:

- Harm is being caused to the biota that is in contact with the contaminants on the land, in the water and sediments on the site;
- Harm may be caused to humans from the increased risk associated with the approved use of the site for residential purposes.
- The disturbance of the acid sulphate soils at the site could cause further mobilisation of the contaminants and hence increase the risk of further harm being caused; and
- There are human and biota exposure pathways to the contamination in the soils, groundwater, sediments, and waters on the site.

#### 4. Further action under the Act:

The making of this declaration does not prevent the carrying out of a voluntary remediation of the site and any person may submit a voluntary remediation proposal for the site to the EPA. If the proposal satisfies the requirements of s.26 of the Act, the EPA may agree not to issue a remediation order to the person or persons bringing the proposal.

#### 5. Submissions invited

The EPA advises that the public may make written submissions to the EPA on:

- whether the EPA should issue a remediation order in relation to the site: and/or
- any other matter concerning the site.

Submissions should be made in writing to:

Regional Manager North Coast  
Environment Protection Authority  
PO Box 498  
**Grafton NSW 2460**

or faxed to: 02 6642 7743

by not later than **6 September 2002**.

ALEX PURVIS,  
Regional Manager North Coast  
ENVIRONMENT PROTECTION AUTHORITY  
(by Delegation)

Date: 2 August 2002.

#### NOTE:

#### Remediation order may follow

If remediation of the site or part of the site is required, the EPA may issue a remediation order under s.23 of the Act.

#### Variation/Revocation

This declaration remains in force until it is otherwise varied or revoked. A declaration may only be revoked when the EPA does not have reasonable grounds to believe that land is contaminated in such a way as to present a significant risk of harm (s.44 of the Act).

#### Information recorded by the EPA

S.58 of the Contaminated Land Management Act 1997 requires the EPA to maintain a public record. A copy of this remediation declaration will be included in the public record.

#### Information recorded by councils

S.59 of the Act requires the EPA to inform the relevant local council as soon as practicable that a declaration has been made. The council is then required to note on its planning certificate issued pursuant to s.149 (2) of the Environmental Planning and Assessment Act that the land is currently within a remediation site. The EPA is required to notify council as soon as practicable when the declaration is no longer in force and the notation on the s.149 (2) certificate is removed.
