CONTAMINATED LAND MANAGEMENT ACT 1997

Environment Protection Authority

Declaration of Remediation Site

Section 21 of the Contaminated Land Management Act
1997

File No.: HO7035/03.
Declaration No.: 21084.
Area No.: UB 3377.

THE Environment Protection Authority ("EPA") declares the following land to be a remediation site under the Contaminated Land Management Act 1997 ("the Act"):

1. Land to which this declaration applies

The land presently known as:

- 887-893 Bourke Street, Waterloo NSW, which is Lots A and B in DP 438772 and Lot 1 in DP89250;
 - 895-899 Bourke Street, Waterloo NSW, which is Lot 1 in DP 88482;
 - 901 Bourke Street, Waterloo NSW, which is Lot B in DP 88095;
 - Parts of 207-229 Young Street, Waterloo NSW, which is Lot 3 in DP 775039; and
 - Parts of Lot 2 in DP 800705,
- as shown on the attached map. The land is located in the South Sydney Local Government Area.

2. Nature of the substances causing the contamination

Elevated levels of chlorinated hydrocarbons, including tetrachloroethene (PCE), trichloroethene (TCE), dichloroethene (DCE), and vinyl chloride have been detected in the groundwater on the land to which this declaration applies.

3. Nature of harm that the substances may cause

The EPA has considered the matters in section 9 of the Act and found that:

- Groundwater beneath the site is contaminated with volatile chlorinated compounds (including PCE, TCE, DCE, and vinyl chloride), at concentrations substantially exceeding relevant levels in the ANZECC Guidelines for Fresh and Marine Water Quality (the guideline). Vinyl chloride concentrations substantially exceed the guideline levels for drinking purposes;
- Contaminated groundwater has migrated from the southwestern (down-gradient) boundary of the site at 887-893 Bourke Street, Waterloo, and impacted on the adjoining sites. The contaminated groundwater plume may continue to spread; and

- The offsite migration of contaminated groundwater may potentially put the users of groundwater at risk.

The extent of the off-site plume is not known and requires further investigation.

On this basis the EPA has determined that the land to which this declaration applies is contaminated with substances in such a way as to present a significant risk of harm to human health and the environment. In particular:

- Vinyl chloride is classified by the International Agency for Research on Cancer (IRAC) as a Group 1 human carcinogen (known human carcinogen);
- TCE and PCE are classified by IARC as Group 2A (probable human carcinogen); and
- DCE is classified by IARC as Group 2B (possibly carcinogenic to humans).

4. Further action under the Act

The making of this declaration does not prevent the carrying out of a voluntary remediation of the site and any person may submit a voluntary remediation proposal for the site to the EPA. If the proposal satisfies the requirements of section 26 of the Act, the EPA may agree to the proposal and not issue a remediation order.

5. Submissions invited

The EPA advises that the public may make written submissions to the EPA on:

- Whether it should issue a remediation order in relation to the site, and/or
- Any other matter concerning the site.

Submissions should be sent in writing to:

A/Director Contaminated Sites,
NSW EPA,
PO Box A290, Sydney South NSW 1232,

or faxed to (02) 9995 5999, by no later than 4 weeks from the date of this notice.

CAROLYN STRANGE,
Director,
Contaminated Sites
(by delegation)

Dated: 2 November 2005.

NOTE:

Remediation order may follow

If remediation of the site or part of the site is required, the EPA may issue a remediation order under s.23 of the Act.

Variation/Revocation

This declaration remains in force until it is otherwise varied or revoked. A declaration may only be revoked when the EPA does not have reasonable grounds to believe that land is contaminated in such a way as to present a significant risk of harm (s.44 of the Act).

Information recorded by the EPA

S.58 of the Contaminated Land Management Act 1997, requires the EPA to maintain a public record. A copy of this remediation declaration will be included in the public record.

Information recorded by councils

S.59 of the Act requires the EPA to give a copy of this declaration to the relevant local council. The council is then required to note on its planning certificate issued pursuant to s.149 (2) of the Environmental Planning and Assessment Act that the land is currently within a declaration area. The EPA is required to notify council as soon as practicable when the declaration is no longer in force and the notation on the s.149(2) certificate can be removed.

CAROLYN STRANGE,
Director,
Contaminated Sites,
Department of Environment and Conservation
(by delegation)

Dated: 7 November 2005.

CONTAMINATED LAND MANAGEMENT ACT 1997

Environment Protection Authority

Notice to End Remediation Declaration

Section 22 of the Contaminated Land Management Act
1997

Notice No. 22004

The Environment Protection Authority ("EPA") is satisfied that it no longer has reasonable grounds to believe that the following land is contaminated in such a way as to present a significant risk of harm. As a result, remediation site declaration number 21020, dated 2 August 2002 and gazetted on 9 August 2002, in so far as it relates to the following land, ceases to be in force from the date on which this notice is published.

Land to which this notice applies
