### CONTAMINATED LAND MANAGEMENT ACT 1997

Environment Protection Authority

Declaration of Remediation Site  
(Section 21 of the Contaminated Land Management Act 1997)

Declaration Number 21085; Area Number 3211

THE Environment Protection Authority (EPA) declares the following land to be a remediation site under the Contaminated Land Management Act 1997 (“the Act”):

#### 1. Land to which this declaration applies (“the site”)

The site comprises Lot 201, DP 788578 which is on the southwest corner of Page and Holloway Streets, Pagewood NSW, in the local government area of the City of Botany Bay.

#### 2. Nature of contamination affecting the site:

The EPA has found that the site is contaminated with the following chlorinated hydrocarbons: trichloroethene (TCE) and tetrachloroethene (PCE) (“the contaminants”).

#### 3. Nature of harm that the contaminants has caused:

The EPA has considered the matters in s.9 of the Act and for the following reasons has determined that the site is contaminated in such a way as to present a significant risk of harm to human health and the environment:

- This site is a source for the contaminants. They have been detected in groundwater onsite and, in particular, along the southern boundary in concentrations exceeding relevant human health and environmental guidelines;
- The contaminants have migrated offsite and impacted on groundwater in the vicinity and there are several domestic groundwater bores within about 200 m of the site; and
- There is the potential for exposure to the contaminated groundwater despite the Department of Infrastructure Planning and Natural Resource’s Groundwater Extraction Exclusion Area (as of July 2005) precluding the use of groundwater in this area.

#### 4. Further action under the Act

The making of this declaration does not prevent the carrying out of a voluntary remediation of the site and any person may submit a voluntary remediation proposal for the site to the EPA. If the proposal satisfies the requirements of s.26 of the Act, the EPA may agree not to issue a remediation order to the person or persons bringing the proposal.

**5. Submissions invited**

The public may make written submissions to the EPA on:

- Whether the EPA should issue a remediation order in relation to the site; or
- Any other matter concerning the site.

Submissions should be made in writing to:

Director Contaminated Sites,  
Department of Environment and Conservation,  
PO Box A290, Sydney South NSW 1232,  
or faxed to (02) 9995 5930,  
by not later than Wednesday, 28 September 2005.  
Dated: 31 August 2005.

CAROLYN STRANGE,  
Director,  
Contaminated Sites,  
Department of Environment and Conservation

**NOTE:****Remediation order may follow**

If remediation of the site or part of the site is required, the EPA may issue a remediation order under s.23 of the Act.

**Variation/Revocation**

This declaration may be varied by subsequent declarations. It remains in force until it is otherwise revoked. A declaration may only be revoked when the EPA does not have reasonable grounds to believe that land is contaminated in such a way as to present a significant risk of harm (s.44 of the Act).

**Information recorded by the EPA**

Section 58 of the Contaminated Land Management Act 1997 requires the EPA to maintain a public record. A copy of this remediation declaration will be included in the public record.

**Information recorded by councils**

Section 59 of the Act requires the EPA to give a copy of this declaration to the relevant local council. The council is then required to note on its planning certificate issued pursuant to s.149(2) of the Environmental Planning and Assessment Act that the land is currently within a remediation site. The EPA is required to notify council as soon as practicable when the declaration is no longer in force and the notation on the s.149(2) certificate is no longer required.

**Relationship to other regulatory instrument**

This declaration does not affect the provisions of any relevant environmental planning instruments which apply to the land or provisions of any other environmental protection legislation administered by the EPA.
