MARITIME SERVICES ACT 1935

Section 38(4A)

Direction exempting certain vessels from the requirement that a registration number be displayed on each side of the vessel in accordance with clause 11(12) of the Water Traffic Regulations – NSW

DIRECTION

THE Maritime Authority of NSW (Trading as “NSW Maritime”), does pursuant to Section 38(4A) of the Maritime Services Act 1935 HEREBY DIRECT that Clause 11(12) of the Water Traffic Regulations – NSW (‘the Regulation’) which requires, inter alia, that a registrable vessel must have Registration Numbers displayed on each side of the vessel in figures at least 150mm high which are clearly distinguishable at a distance of at least 60 metres, DOES NOT APPLY to the vessels described in SCHEDULE 1, PROVIDED THAT there is full compliance with the conditions set out in SCHEDULE 2.

SCHEDULE 1

Description of Vessels

Jet Powered Surf Boards, or any motorised Surf Board.

SCHEDULE 2

Conditions To Which The Exempt Vessels are Subject

In order for a vessel described in Schedule 1 to be Exempt from the requirements of Clause 11(12) of the Regulation there must be full compliance with EACH of the following conditions:

- (a) The distinguishing number contained in the Certificate of Registration relating to the vessel, must be displayed in the following manner:
 - (i) in figures at least 100mm high which are manufactured from marine vinyl or similar product;
 - (ii) on each side of the front top leading surface of the vessel; and
 - (iii) securely attached and flush with the surface of the vessel.
- (b) Except in relation to the display of Registration Numbers, the vessel, and its owner and master, must comply with the all requirements for Personal Watercraft (PWC) under the Marine Legislation.

IT IS NOTED THAT:

If Schedule 2 is not adhered to, the vessel will be deemed to be in breach of Clause 11(13)(c) of the Water Traffic Regulations – NSW and both the Owner and Master are guilty of an offence under the Regulation.

REVOCATION OF THIS DIRECTION

This Direction may be revoked at any time by the Chief Executive of NSW Maritime or the General Manager, Recreational Boating and Regional Services, NSW Maritime.

DATE OF EFFECT AND EXPIRY

I have made this Direction after receiving an application from the Managing Director of Powerski Jetboards Australia Pty Ltd, a person affected by the Regulations, and being satisfied that compliance with the Regulations is unnecessary due to the physical construction of the vessel, the difficulty

which would be experienced if the vessels were required to display Registration Numbers as prescribed, and the adequate equivalent solution proposed above in Schedule 2.

This Direction is effective on and from 1 August 2008 until revoked by NSW Maritime

Dated this 17th day of July 2008.

Definitions

6. In this Notice of Exemption:

ARMCANZ means the *Australian Guidelines for Sewerage Systems - Biosolids Management*, published in 1995 by the ARMCANZ Water Technology Committee, Canberra and updated from time to time.

Composting means a process whereby the food waste and/or raw mulch, source separated garden organics, forestry and sawmill residues and urban wood residues, undergoes a process of managed biological transformation:

- (a) to achieve pasteurisation, and
- (b) for a period of not less than a total of 6 weeks of composting and curing and/or until an equivalent level of biological stability can be demonstrated.

Consumer means a person who applies, causes, or permits the application to land of food waste compost within the definitions of "application to land" in accordance with the Act. The consumer may be the landholder responsible for the land to which food waste compost is applied.

Engineered wood products means engineered or composite wood products such as particleboard, oriented strand board, plywood, laminated veneer lumber, glulam or fibreboard that are manufactured with glues, resins, water repellents, fire retardants, fungal inhibitors and/or other chemicals.

Food waste means waste from the manufacture, preparation, sale or consumption of food but does not include grease trap waste, animal waste or dissolved air flotation (DAF) sludges. This includes waste from the kerbside collection of source separated food waste.

Food waste compost means food waste that has undergone composting in combination with any of the following:

- (a) raw mulch,
- (b) source separated garden organics,
- (c) forestry and sawmill residues, and
- (d) urban wood residues.

Forestry and sawmill residues are untreated and uncontaminated plant materials from forestry operations such as logging, silviculture and sawmilling. Forestry and sawmill residues include materials such as bark, woodchip, sawdust and wood fibre that are collected as a source separated material stream for processing.

Pasteurisation means a process whereby the food waste and/or raw mulch, source separated garden organics, forestry and sawmill residues and urban wood residues, are treated to significantly reduce the numbers of plant and animal pathogens and plant propagules. It must undergo:

- (a) Appropriate turning of outer material to the inside of the windrow so that the whole mass is subjected to a minimum of 3 turns with the internal temperature reaching a minimum of 55°C for 3 consecutive days before each turn, or
- (b) An alternative process that guarantees the same level of pathogen reduction as required by ARMCANZ, and the elimination of plant propagules.

Preservative treated and coated wood residues means wood residues that are preservative treated with chemicals such as copper chrome arsenate (CCA), high temperature creosote (HTC), pigmented emulsified creosote (PEC) and light organic solvent preservative (LOSP) and/or coated with substances such as varnish or paint.

Processor means a person who processes, mixes, blends, or otherwise incorporates food waste compost into a material for supply to a consumer.

Raw mulch is any compostable organic plant material that is applied to land as a recycled organic product without having been subjected to an effective pasteurisation or composting process. Such materials may be shredded and/or screened to a preferred particle size grading for particular applications. Raw mulches include materials such as horticultural barks, leaf mulch and wood chip mulch produced from source separated garden organics, forestry and sawmill residues and urban wood residues.

Relevant waste means food waste compost that meets the requirements of Section 7.

Source separated garden organics means garden vegetation and plant materials that are segregated at the point of generation and are collected as a separate material stream for processing. Source separated garden organics includes material from Council garden waste collections and public drop-off collections and can include materials such as branches, grass, leaves, plant trimmings, tree stumps, bark, and the like.

Urban wood residues means untreated and uncontaminated urban derived timber and wood material that is collected as a separate material stream for processing.  - 7.1. The food waste compost can only be applied to land as compost, a soil amendment material or for the purpose of biofiltration.
 - 7.2. The processor of food waste compost must provide a written statement of compliance to the consumer with each transaction, certifying that the food waste compost complies with the relevant conditions of this exemption.
 - 7.3. The consumer must land apply the food waste compost within a reasonable period of time.

Exemption Granted

Mark Gorta
Manager, Waste Management Section
Environment Protection Authority
by delegation

Notes

The EPA may amend or revoke this exemption at any time. It is the responsibility of the generator, processor and consumer to ensure that they comply with all relevant requirements of the most current exemption. The current version of an exemption will be available on the EPA website: www.environment.nsw.gov.au

In gazetting this general exemption, the EPA is exempting the relevant waste from the specific requirements of the Act and Regulations as stated in this exemption. The EPA is not in any way endorsing the use of this substance or guaranteeing that the substance will confer benefit.

The use of exempted material remains subject to other relevant environmental regulations within the Act and Regulations. For example, a person who pollutes land (s142A) or water (s120), or does not meet the special requirements for asbestos waste (clause 42), regardless of having an exemption, is guilty of an offence and subject to prosecution.

For the purposes of arrangements between a generator, a processor and a consumer, a 'transaction' is taken to mean the contractual agreement between the two parties which specifies the exchange of waste material from one party to another. A 'statement of compliance' must be in writing and be provided with each transaction.

The conditions set out in this exemption are designed to minimise the risk of potential harm to the environment, human health or agriculture, however, neither this exemption nor these conditions guarantee that the environment, human health or agriculture will not be harmed.

It should be noted that other contaminants may be present in the relevant waste that can potentially cause harm. Application rates may need to be lower than those listed in the exemption depending on local circumstances and should be determined as appropriate to those circumstances prior to application. Plants may display symptoms of toxicity, and/or reductions in yield may occur at values below the maximum concentration limits specified in this exemption.

The consumer should assess whether or not the exempted material is fit for the purpose the material is proposed to be used and whether this use will cause harm. The consumer may need to seek expert engineering or technical advice.

This exemption does not apply to any material received at a premises that is required to be licensed for waste disposal (application to land) activities under the provisions of the Act. This exemption does not remove the need for a site at which processing occurs to be licensed, if required under Schedule 1 of the Act.

This exemption does not alter the requirements of any other relevant legislation that must be met in utilising this material, including for example, the need to prepare a Material Safety Data Sheet (MSDS).

Regardless of any exemption provided by the EPA, the person who causes or permits the application of the substance to land must ensure that the action is lawful and consistent with the development consent requirements of the land.

All records required to be kept under this exemption must be made available to authorised officers of the EPA upon request.

Failure to comply with the conditions of this Notice of Exemption may constitute an offence under clause 51 of the Regulation and the responsible person will be required to comply with the normal regulatory provisions.

Exemption Granted

Mark Gorta
Manager, Waste Management Section
Environment Protection Authority
by delegation

Notes

The EPA may amend or revoke this exemption at any time. It is the responsibility of the generator, processor and consumer to ensure that they comply with all relevant requirements of the most current exemption. The current version of an exemption will be available on the EPA website: www.environment.nsw.gov.au

In gazetting this general exemption, the EPA is exempting the relevant waste from the specific requirements of the Act and Regulations as stated in this exemption. The EPA is not in any way endorsing the use of this substance or guaranteeing that the substance will confer benefit.

The use of exempted material remains subject to other relevant environmental regulations within the Act and Regulations. For example, a person who pollutes land (s142A) or water (s120), or does not meet the special requirements for asbestos waste (clause 42), regardless of having an exemption, is guilty of an offence and subject to prosecution.

For the purposes of arrangements between a generator, a processor and a consumer, a 'transaction' is taken to mean the contractual agreement between the two parties which specifies the exchange of waste material from one party to another. A 'statement of compliance' must be in writing and be provided with each transaction.

The conditions set out in this exemption are designed to minimise the risk of potential harm to the environment, human health or agriculture, however, neither this exemption nor these conditions guarantee that the environment, human health or agriculture will not be harmed.

The consumer should assess whether or not the exempted material is fit for the purpose the material is proposed to be used and whether this use will cause harm. The consumer may need to seek expert engineering or technical advice.

This exemption does not apply to any material received at a premises that is required to be licensed for waste disposal (application to land) activities under the provisions of the Act. This exemption does not remove the need for a site at which processing occurs to be licensed, if required under Schedule 1 of the Act.

This exemption does not alter the requirements of any other relevant legislation that must be met in utilising this material, including for example, the need to prepare a Material Safety Data Sheet (MSDS).

Regardless of any exemption provided by the EPA, the person who causes or permits the application of the substance to land must ensure that the action is lawful and consistent with the development consent requirements of the land.

All records required to be kept under this exemption must be made available to authorised officers of the EPA upon request.

Failure to comply with the conditions of this Notice of Exemption may constitute an offence under clause 51 of the Regulation and the responsible person will be required to comply with the normal regulatory provisions.
