Resource Recovery Order under Part 9, Clause 93 of the Protection of the Environment Operations (Waste) Regulation 2014

The Closed Loop rapidly decomposed food waste order June 2016

Introduction

This order, issued by the Environment Protection Authority (EPA) under clause 93 of the Protection of the Environment Operations (Waste) Regulation 2014 (Waste Regulation), imposes the requirements that must be met by processors of rapidly decomposed food waste from specified Closed Loop units, to which 'the Closed Loop rapidly decomposed food waste exemption June 2016' applies. The requirements in this order apply to the supply of rapidly decomposed food waste for application to land as a soil amendment.

1. Waste to which this order applies

- 1.1. This order applies to rapidly decomposed food waste. In this order, rapidly decomposed food waste means the decomposed output from the mechanical mixing and heating of food waste produced by specified Closed Loop units.

2. Persons to whom this order applies

- 2.1. The requirements in this order apply, as relevant, to any person who supplies rapidly decomposed food waste that has been generated, processed or recovered by the person.
- 2.2. This order does not apply to the supply of rapidly decomposed food waste to a consumer for land application at a premises for which the consumer holds a licence under the POEO Act that authorises the carrying out of the scheduled activities on the premises under clause 39 'waste disposal (application to land)' or clause 40 'waste disposal (thermal treatment)' of Schedule 1 of the POEO Act.

3. Duration

- 3.1. This order commences on 27 June 2016 and is valid until 27 June 2018 unless revoked by the EPA in writing at an earlier date.

4. Processor requirements

The EPA imposes the following requirements on any processor who supplies rapidly decomposed food waste.

General conditions

- 4.1. On or before supplying rapidly decomposed food waste, the processor must

ensure that the rapidly decomposed food waste:

- 4.1.1. does not include grease trap waste or animal waste.
- 4.1.2. does not contain any physical contaminants, including but not limited to glass, metal, rigid plastics, flexible plastics or polystyrene.
- 4.1.3. is in a form and condition that is suitable for land application as a soil amendment.
- 4.1.4. has completed at least one full operational cycle by the specified unit.

Sampling requirements

- 4.2. On or before supplying rapidly decomposed food waste, the processor must:
 - 4.2.1. Prepare a written sampling plan for the rapidly decomposed food waste which includes a description of the input to the specific unit sampled, sample preparation, and storage procedures for the rapidly decomposed food waste samples. The sampling plan must include the appropriate holding times for all tests including microbiological testing.
 - 4.2.2. Undertake sampling and testing of the rapidly decomposed food waste as required under clause 4.3. The sampling must be carried out in accordance with the written sampling plan.
- 4.3. The processor must undertake characterisation of the rapidly decomposed food waste by:
 - 4.3.1. collecting 10 composite samples and testing each sample for the chemicals and other attributes listed in Column 1 of Table 1. Each composite sample must be taken from a single batch that has not been previously sampled for the purposes of characterisation. A maximum of two composite samples must be collected per month. Characterisation must be conducted on the rapidly decomposed food waste within 12 months following the commencement of this order, or the commencement of the process (whichever comes first)¹; or
 - 4.3.2. an alternative sampling and testing program that is approved by the EPA.

Chemical and other material requirements

- 4.4. The processor must not supply rapidly decomposed food waste to any person if, in relation to any of the chemical and other attributes of the rapidly decomposed food waste:
 - 4.4.1. The concentration or other value of that attribute of any sample collected and tested as part of the characterisation of the rapidly decomposed food waste exceeds the absolute maximum concentration or other value listed in Column 2 of Table 1.
- 4.5. The absolute maximum concentration or other value of that attribute in any rapidly decomposed food waste supplied under this order must not exceed the absolute maximum concentration or other value listed in Column 2 of Table 1.

¹ Processors should note that further testing will be required after the first year. Further testing will be determined on the review of the results from the first year.

5. Definitions

In this order:

animal waste means dead animals and animal parts and any mixture of dead animals and animal parts².

application or apply to land means applying to land by:

- spraying, spreading or depositing on the land;
- ploughing, injecting or mixing into the land; or
- filling, raising, reclaiming or contouring the land.

consumer means a person who applies, or intends to apply, rapidly decomposed food waste to land.

composite sample means a sample that combines five discrete sub-samples of equal size into a single sample for the purpose of analysis.

food waste means food waste from the manufacture, preparation, sale or consumption of food but does not include grease trap waste or animal waste.

grease trap waste means any grease, oils, solids, water or other matter resulting only from the preparation or manufacturing of food that is collected in a grease trap in the usual course of the operation of the grease trap. This definition includes dissolved air flotation (DAF) units used to treat grease trap waste, but does not include grease trap waste collected from grease traps in hospitals and shopping centres other than those solely from the preparation of food.

specified Closed Loop unit means the “CLO units” by Closed Loop Environmental Solutions Pty Ltd. The CLO unit is an enclosed vessel that uses a start-up culture of aerobic thermophilic bacteria and operates with agitation, forced airflow and an internal temperature of 60°C to 63°C (achieved by way of a jacketed external oil chamber maintained at 120°C) for a minimum period of 24 hours.

processor means a person who processes rapidly decomposed food wastes for supply to a consumer.

transaction means:

- in the case of a one-off supply, the supply of a batch, truckload or stockpile of rapidly decomposed food waste that is not repeated.
- in the case where the supplier has an arrangement with the recipient for more than one supply of rapidly decomposed food waste, the first supply of rapidly decomposed food waste as required under the arrangement.

Notes

The EPA may amend or revoke this order at any time. It is the responsibility of the processor to ensure it complies with all relevant requirements of the most current order.

In gazetting or otherwise issuing this order, the EPA is not in any way endorsing the supply or use of this substance or guaranteeing that the substance will confer benefit.

The conditions set out in this order are designed to minimise the risk of potential harm to the environment, human health or agriculture, although neither this order nor the accompanying exemption guarantee that the environment, human health or agriculture will not be harmed.

While this order requires that the rapidly decomposed food waste must not contain physical contaminants including but not limited to glass, metal, rigid plastics, flexible plastics, or polystyrene, the EPA recognises that the rapidly decomposed food waste may contain extremely low or incidental amounts of physical contaminants. The processor must implement procedures to prevent the presence of physical contaminants in the rapidly decomposed food waste. These procedures must be formally documented and their implementation demonstrated. However, as noted in this order, the rapidly decomposed food waste must not contain any grease trap waste or animal waste.

Animal waste is defined as dead animals and animal parts and any mixture of these. Under the food waste definition in this order, it is intended that for example, meat waste from commercial kitchens and plate scrapings would be considered as food waste. However, animal carcasses or parts of animals from an animal slaughtering process are excluded.

Regardless of any exemption or order provided by the EPA, the person who causes or permits the application of the substance to land must ensure that the action is lawful and consistent with any other legislative requirements including, if applicable, any development consent(s) for managing operations on the site(s).

The supply of rapidly decomposed food waste remains subject to other relevant environmental regulations in the POEO Act and Waste Regulation. For example, a person who pollutes land (s. 142A) or water (s. 120), or causes air pollution through the emission of odours (s. 126), or does not meet the special requirements for asbestos waste (Part 7 of the Waste Regulation), regardless of this order, is guilty of an offence and subject to prosecution.

This order does not alter the requirements of any other relevant legislation that must be met in supplying this material, including, but not limited to the *Stock Diseases Act 1923* and *Stock Diseases Regulation 2009*.

Failure to comply with the conditions of this order constitutes an offence under clause 93 of the Waste Regulation.

Notes

The EPA may amend or revoke this order at any time. It is the responsibility of the processor to ensure it complies with all relevant requirements of the most current order.

In gazetting or otherwise issuing this order, the EPA is not in any way endorsing the supply or use of this substance or guaranteeing that the substance will confer benefit.

The conditions set out in this order are designed to minimise the risk of potential harm to the environment, human health or agriculture, although neither this order nor the accompanying exemption guarantee that the environment, human health or agriculture will not be harmed.

While this order requires that the rapidly decomposed food waste must not contain physical contaminants including but not limited to glass, metal, rigid plastics, flexible plastics, or polystyrene, the EPA recognises that the rapidly decomposed food waste may contain extremely low or incidental amounts of physical contaminants. The processor must implement procedures to prevent the presence of physical contaminants in the rapidly decomposed food waste. These procedures must be formally documented and their implementation demonstrated. However, as noted in this order, the rapidly decomposed food waste must not contain any grease trap waste or animal waste.

Animal waste is defined as dead animals and animal parts and any mixture of these. Under the food waste definition in this order, it is intended that for example, meat waste from commercial kitchens and plate scrapings would be considered as food waste. However, animal carcasses or parts of animals from an animal slaughtering process are excluded.

Regardless of any exemption or order provided by the EPA, the person who causes or permits the application of the substance to land must ensure that the action is lawful and consistent with any other legislative requirements including, if applicable, any development consent(s) for managing operations on the site(s).

The supply of rapidly decomposed food waste remains subject to other relevant environmental regulations in the POEO Act and Waste Regulation. For example, a person who pollutes land (s. 142A) or water (s. 120), or causes air pollution through the emission of odours (s. 126), or does not meet the special requirements for asbestos waste (Part 7 of the Waste Regulation), regardless of this order, is guilty of an offence and subject to prosecution.

This order does not alter the requirements of any other relevant legislation that must be met in supplying this material, including, but not limited to the *Stock Diseases Act 1923* and *Stock Diseases Regulation 2009*.

Failure to comply with the conditions of this order constitutes an offence under clause 93 of the Waste Regulation.

Resource Recovery Order under Part 9, Clause 93 of the Protection of the Environment Operations (Waste) Regulation 2014

The Eco Guardians rapidly dehydrated food waste order June 2016

Introduction

This order, issued by the Environment Protection Authority (EPA) under clause 93 of the Protection of the Environment Operations (Waste) Regulation 2014 (Waste Regulation), imposes the requirements that must be met by processors of rapidly dehydrated food waste from specified Eco Guardians units, to which 'the Eco Guardians rapidly dehydrated food waste exemption June 2016' applies. The requirements in this order apply to the supply of rapidly dehydrated food waste for application to land as a soil amendment.

1. Waste to which this order applies

- 1.1. This order applies to rapidly dehydrated food waste. In this order, rapidly dehydrated food waste means the dehydrated output from the mechanical mixing and heating of food waste produced by specified Eco Guardians units.

2. Persons to whom this order applies

- 2.1. The requirements in this order apply, as relevant, to any person who supplies rapidly dehydrated food waste that has been generated, processed or recovered by the person.
- 2.2. This order does not apply to the supply of rapidly dehydrated food waste to a consumer for land application at a premises for which the consumer holds a licence under the POEO Act that authorises the carrying out of the scheduled activities on the premises under clause 39 'waste disposal (application to land)' or clause 40 'waste disposal (thermal treatment)' of Schedule 1 of the POEO Act.

3. Duration

- 3.1. This order commences on 27 June 2016 and is valid until 27 June 2018 unless revoked by the EPA in writing at an earlier date.

4. Processor requirements

The EPA imposes the following requirements on any processor who supplies rapidly dehydrated food waste.

General conditions

- 4.1. On or before supplying rapidly dehydrated food waste, the processor must

ensure that the rapidly dehydrated food waste:

- 4.1.1. does not include grease trap waste or animal waste.
- 4.1.2. does not contain any physical contaminants, including but not limited to glass, metal, rigid plastics, flexible plastics or polystyrene.
- 4.1.3. is in a form and condition that is suitable for land application as a soil amendment.
- 4.1.4. has completed at least one full operational cycle by the specified unit.

Sampling requirements

- 4.2. On or before supplying rapidly dehydrated food waste, the processor must:
 - 4.2.1. Prepare a written sampling plan for the rapidly dehydrated food waste which includes a description of the input to the specific unit sampled, sample preparation, and storage procedures for the rapidly dehydrated food waste samples. The sampling plan must include the appropriate holding times for all tests including microbiological testing.
 - 4.2.2. Undertake sampling and testing of the rapidly dehydrated food waste as required under clause 4.3. The sampling must be carried out in accordance with the written sampling plan.
- 4.3. The processor must undertake characterisation of the rapidly dehydrated food waste by:
 - 4.3.1. collecting 10 composite samples and testing each sample for the chemicals and other attributes listed in Column 1 of Table 1. Each composite sample must be taken from a single batch that has not been previously sampled for the purposes of characterisation. A maximum of two composite samples must be collected per month. Characterisation must be conducted on the rapidly dehydrated food waste within 12 months following the commencement of this order, or the commencement of the process (whichever comes first)¹; or
 - 4.3.2. an alternative sampling and testing program that is approved by the EPA.

Chemical and other material requirements

- 4.4. The processor must not supply rapidly dehydrated food waste to any person if, in relation to any of the chemical and other attributes of the rapidly dehydrated food waste:
 - 4.4.1. The concentration or other value of that attribute of any sample collected and tested as part of the characterisation of the rapidly dehydrated food waste exceeds the absolute maximum concentration or other value listed in Column 2 of Table 1.
- 4.5. The absolute maximum concentration or other value of that attribute in any rapidly dehydrated food waste supplied under this order must not exceed the absolute maximum concentration or other value listed in Column 2 of Table 1.

¹ Processors should note that further testing will be required after the first year. Further testing will be determined on the review of the results from the first year.

Table 1

Column 1	Column 2
Chemical and other attributes	Absolute maximum concentration¹ (% 'dry weight' unless otherwise specified)
1. Salmonella spp.	Absent in 25 grams
2. Escherichia coli (E. coli)	Absent at limit of detection (Most probable number per gram)
3. Clostridium perfringens	Absent at limit of detection (colony forming units per gram)
4. Bacillus cereus	Absent at limit of detection (colony forming units per gram)
5. Particle size >9.5 mm	0 % mass
6. Electrical conductivity	N/A ²
7. Sodium mg/kg	N/A ²
8. Moisture content percentage	10%

¹Processors should note that holding times for some of these tests are short and processors should check with the laboratories before sampling. For example, some microorganism samples must be analysed within 24 hours of collection.

²While limits are not included for 6 and 7, these must be tested in each sample and records kept of the results.

Test methods

- 4.6. The processor must ensure that any testing of samples required by this order is undertaken by analytical laboratories accredited by the National Association of Testing Authorities (NATA), or equivalent.
- 4.7. The processor must ensure that the chemical and other attributes (listed in Column 1 of Table 1) in the rapidly dehydrated food waste supplied are tested in accordance with the test methods specified below. Where an equivalent analytical method is used the detection limit must be equal to or less than the detection limit for the method given below.
- 4.7.1. Test method for the detection of Salmonella:
- 4.7.1.1. Australian Standard 5013.10-2009 Food microbiology - Microbiology of food and animal feeding stuffs - Horizontal method for the detection of Salmonella spp., or an equivalent analytical method.
