

Government Gazette

of the State of

New South Wales

Number 152

Friday, 22 November 2019

The New South Wales Government Gazette is the permanent public record of official NSW Government notices. It also contains local council, private and other notices.

From 1 January 2019, each notice in the Government Gazette has a unique identifier that appears in round brackets at the end of the notice and that can be used as a reference for that notice (for example, (n2019-14)).

The Gazette is compiled by the Parliamentary Counsel's Office and published on the NSW legislation website (www.legislation.nsw.gov.au) under the authority of the NSW Government. The website contains a permanent archive of past Gazettes.

To submit a notice for gazettal – see Gazette Information.

LIST OF AUTHORISED EXPLOSIVES AND CATEGORIES OF PROHIBITED EXPLOSIVES IN NSW

UNDER THE EXPLOSIVES REGULATION 2013

SAFEWORK NSW

AUGUST 2019

REGISTER OF EXPLOSIVES

The publication of this register, containing a list of authorised explosives and categories of prohibited explosives for NSW, is approved by SafeWork NSW, in accordance with clause 63 of the Explosives Regulation 2013. It replaces the previous list published in December 2016.

Disclaimer

This publication may contain information about the regulation and enforcement of work health and safety in NSW. It may include some of your obligations under some of the legislation that SafeWork NSW administers. To ensure you comply with your legal obligations you must refer to the appropriate legislation.

Information on the latest laws can be checked by visiting the NSW legislation website www.legislation.gov.au

This publication does not represent a comprehensive statement of the law as it applies to particular problems or to individuals or as a substitute for legal advice. You should seek independent legal advice if you need assistance on the application of the law to your situation.

4.7. Unauthorised explosives	48

INTRODUCTION

SafeWork NSW follows the United Nations (UN) system for classifying explosives for transport, as a means of identifying explosive hazards. This classification system categorises explosives into hazard levels by assigning different divisions – such as 1.1, 1.2, 1.3, 1.4, 1.5 and 1.6.

These divisions are further assigned to groups that are compatible with each other and allow safe storage and transport without increasing the risk or hazard associated with the explosives.

The full classification of an explosive is known as its classification code and comprises the hazard division followed by a letter, known as the compatibility group.

The common hazard divisions encountered in NSW are:

- Division 1.1 – substances and articles which have a mass explosion hazard.
- Division 1.3 – substances and articles which have a fire hazard with minor blast or projection hazard.
- Division 1.4 – substances and articles which present no significant hazard.
- Division 1.5 – very insensitive substances which have a mass explosion hazard.

The common compatibility groups encountered in NSW are:

- B – articles containing a very sensitive primary explosive substance.
- C – an explosive substance used to propel projectiles out of a weapon.
- D – a detonating explosive that can cause mass destruction.
- G – a pyrotechnic substance or article used to give light, create smoke, or give a loud report.
- S – a substance or article packed in a package in a manner that it will not present any significant hazard if it is accidentally functioned within that package.

An example of a ‘most hazardous explosive’ is a detonator that has a classification code of 1.1B. An example of a ‘least hazardous explosive’ is a party popper, in its packaging, which has a classification code of 1.4S.

Part 4 of the Explosives Regulation 2013 provides that SafeWork NSW as the regulatory authority may register an explosive as an authorised explosive under the UN classification system outlined above. Clause 54 provides that any explosive not authorised is prohibited. Clause 55 makes it an offence to ‘handle any prohibited explosive’ and clause 64 makes it an offence to falsely represent an explosive as authorised.

When SafeWork NSW authorises an explosive, it assigns a classification code according to the UN system and places the commercial name or trade name, or description, of that explosive on a register. The register contains a list of commercial names or trade names, or descriptions, of all explosives that are currently authorised for use in NSW. If an explosive’s name or description does not appear on the list in Section 1, the explosive is not authorised.

Certain Commonwealth explosives and display fireworks are separately authorised according to Sections 2 and 3 respectively.

1. LISTING BY UNITED NATIONS NUMBER

Under the UN classification system headings of UN number, proper shipping name and classification code, the following table comprises the full listing of commercial or trade names, or descriptions, of the explosives that have been authorised in NSW, in UN number order.

Packaged explosives authorised with a hazard division other than 1.1 are only authorised in the packaging that, when design tested or authorised by analogy, resulted in the classification code being assigned. Use of alternative packagings may result in a higher hazard classification.

The list below contains items in a red box to indicate conditions apply to the authorisation, such as a restriction on authorised product codes, and removes legacy entries for which records are no longer available. Enquiries about either of these changes can be made by contacting SafeWork NSW.

UN number	Proper Shipping Name	Class	Authorised Product Name

Note: The Defence Explosive Ordnance Classification Listing (DEOCL), as amended from time to time, is deemed to be incorporated into this list.

2. AUTHORISED COMMONWEALTH EXPLOSIVES

The Directorate of Ordnance Safety (DOS) is the technical regulator of Explosive Ordnance storage and transport activities within the Australian Defence Organisation. An important activity of the DOS is the compilation of the Defence Explosive Ordnance Classification Listing (DEOCL) issued at regular intervals on a restricted basis.

Increasingly, civilian contractors handle defence ordnance and some of their activities come under the NSW explosives regulatory regime. This makes it necessary to formally recognise the contents of DEOCL as explosives authorised under NSW legislation.

Accordingly, the DEOCL as amended from time to time is recognised in NSW as forming part of the register of authorised explosives under clause 58 of the Explosives Regulation 2013.

3. AUTHORISED DISPLAY FIREWORKS

With the exception of the prohibited fireworks identified in Section 4.2, display fireworks classified by their manufacturer with the proper shipping name FIREWORKS and intended for use by licensed professional pyrotechnicians in a fireworks display are generically authorised in NSW under clause 58 of the Explosives Regulation 2013.

This generic authorisation comprises UN numbers 0333, 0334, 0335, 0336, and 0337, and is only valid where the display fireworks have been classified in accordance with the United Nations Model Regulations (UNMR) and the United Nations Manual of Tests and Criteria (UNMTC). Where test results obtained according to the UNMTC are not available, display fireworks must be classified according to the Default Fireworks Classification Table in the UNMR.

Manufacturers and importers must provide evidence of the basis for the classification of a fireworks article upon request by SafeWork NSW.

4. CATEGORIES OF PROHIBITED EXPLOSIVES

The following categories of explosives are prohibited unless SafeWork NSW has granted an exemption under clause 112 or clause 113 of the Explosives Regulation 2013 or specific authorisation has been granted under clause 58 or 59 of the Explosives Regulation 2013.

4.1. SAFETY CARTRIDGES

A safety cartridge or other munitions is prohibited where:

- a. the bullet is not firmly fixed in the cartridge case
- b. the bullet has a split or cracked case
- c. the bullet has a case that is liable to split or rupture when fired in a properly constructed weapon of a chambering and calibre appropriate to a cartridge of its class
- d. the bullet or other projectile explodes, or contains an incendiary or tracer composition, or contains a lachrymatory, nauseating or toxic substance

but does not include:

- e. a safety cartridge in 4.1 (a), (b) and (c) held under a collector's licence issued by the police if the cartridges are kept separate from cartridges for use or for supply
- f. a safety cartridge for use by the Police Service, the Commonwealth or a State or Territory of the Commonwealth, or by the Armed Services
- g. the import, with the approval in writing of the Regulatory Authority, of a safety cartridge having a bullet or other projectile that contains an incendiary or tracer composition
- h. a safety cartridge having a bullet or other projectile approved in writing by the Regulatory Authority.

4.2. FIREWORKS

A firework is prohibited where the firework:

- a. contains a composition of a chlorate in admixture with sulphur, a sulphide or phosphorus (other than amorces, a streamer cone or a confetti bomb)
- b. is of such construction that firework composition can escape from it
- c. on ignition may project through the air in an erratic or unpredictable flight
- d. contains arsenic or a compound of arsenic as an ingredient of its composition
- e. does not have displayed on it instructions in the English language relating to the manner in which it should be ignited and the manner in which it is designed to behave
- f. ignites in less than three seconds, or more than 15 seconds, after its wick or touch paper has been ignited in accordance with the instructions displayed on it
- g. after having been set up and ignited in accordance with the instructions displayed on it, behaves otherwise than in accordance with those instructions.
- h. can be ignited or discharged by means other than the lighting of a wick, touch paper or by electric initiation, other than a distress signal, amorces, snaps for bon-bon crackers, streamer cones, model rocket propellant devices and confetti bombs
- i. is a rocket other than a distress signal
- j. is a trick firework
- k. is a firecracker that can be initiated by striking on the side of a match-box
- l. are aerial salutes larger than 75mm.

4.3. DISTRESS SIGNALS

A distress signal is prohibited if it does not comply with AS 2092 (Pyrotechnic marine distress flares and signals for pleasure craft) or an equivalent International Standards Organisation standard.

4.4. MODEL ROCKET PROPELLANT DEVICES

A model rocket propellant device is prohibited if it:

- a. contains a composition of a chlorate in admixture with sulphur, a sulphide or phosphorus
- b. is of such construction that ignitable substances can escape from it
- c. may explode either wholly or in part
- d. is used for a purpose other than that allowed for by a recognised model rocket club

The use of model rocket propellant devices containing an ignitable substance or ignitable substances not exceeding 15 grams Net Explosive Quantity (NEQ) does not require a licence.

Model rocket propellant devices containing an ignitable substance or ignitable substances exceeding 15 grams NEQ but not exceeding 62.5 grams NEQ may only be used by a person who is a member of a recognised model rocket club.

Model rocket propellant devices containing an ignitable substance or ignitable substances exceeding 62.5 grams NEQ may only be used by a person who is a member of a recognised model rocket club and holds a pyrotechnician's licence endorsed for the use of such devices.

4.5. LIQUID OXYGEN EXPLOSIVE MIXTURES

A liquid oxygen explosive mixture, which is a mixture of liquid oxygen and a carbonaceous material and is known as a liquid oxygen explosive, is prohibited unless the mixture is created for immediate use as an integral part of a manufacturing process and that process is approved in writing by SafeWork NSW.

4.6. EXPIRED EXPLOSIVES

Any explosive that has passed its manufacturer recommended expiry date is prohibited and shall not be handled other than with the written approval of SafeWork NSW.

4.7. UNAUTHORISED EXPLOSIVES

Any explosive that does not appear on the list of authorised explosives is a prohibited explosive unless otherwise authorised by SafeWork NSW.

(n2019-3608)

COMMERCIAL AGENTS AND PRIVATE INQUIRY AGENTS ACT 2004

NOTIFICATION UNDER CLAUSE 8(1)(b) OF SCHEDULE 2

I, MICHELLE MORGAN, Assistant Director (Determinations), Security Licensing & Enforcement Directorate, as delegate of the Commissioner of Police, give notice, under clause 8(1)(b) of Schedule 2 to the *Commercial Agents and Private Inquiry Agents Act 2004*, that the licensees specified in Column One of the Schedule, hold in a trust account kept at the authorised deposit-taking institution specified in Column Two of the Schedule, the amount of money specified in Column Three of the Schedule, for or on behalf of the person specified in Column Four of the Schedule.

If the money is not paid out of the trust account in which it is held within three months after the date of publication of this notice in the *New South Wales Government Gazette*, the person holding the money will be required to pay it to the Commissioner of Police.

MICHELLE MORGAN
Assistant Director (Determinations)
Security Licensing & Enforcement Directorate
NSW Police Force
Delegate of the Commissioner of Police
