Resource Recovery Order under Part 9, Clause 93 of the Protection of the Environment Operations (Waste) Regulation 2014

The steel furnace slag order 2019

Introduction

This order, issued by the Environment Protection Authority (EPA) under clause 93 of the Protection of the Environment Operations (Waste) Regulation 2014 (Waste Regulation), imposes the requirements that must be met by suppliers of steel furnace slag or blended steel furnace slag to which *The steel furnace slag exemption 2019* applies. The requirements in this order apply in relation to the supply of steel furnace slag and blended steel furnace slag for application to land in line with the uses described in *The steel furnace slag exemption 2019*.

1. Waste to which this order applies

- 1.1. This order applies to steel furnace slag and steel furnace slag blended with other materials (blended steel furnace slag). In this order, **steel furnace slag** means waste formed from the reaction of molten iron, scrap steel and fluxes in a Basic Oxygen Steel (BOS) furnace during the manufacture of steel. Steel furnace slag does not include any bag house dust or air pollution control residues.

2. Persons to whom this order applies

- 2.1. The requirements in this order apply as relevant, to any person who supplies steel furnace slag or blended steel furnace slag that has been generated, processed or recovered by the person.
- 2.2. This order does not apply to the supply of steel furnace slag or blended steel furnace slag to a consumer for land application at a premises for which the consumer holds a licence under the POEO Act that authorises the carrying out of the scheduled activities on the premises under clause 39 'waste disposal (application to land)' or clause 40 'waste disposal (thermal treatment)' of Schedule 1 of the POEO Act.

3. Duration

- 3.1. This order commences on 16 December 2019 and is valid until revoked by the EPA by notice published in the Government Gazette.

4. Revocation

- 4.1. *The steel furnace slag order 2017* which commenced on 21 July 2017 is revoked from 16 December 2019.

5. Generator requirements

The EPA imposes the following requirements on any generator who supplies steel furnace slag.

Sampling requirements

- 5.1. On or before supplying steel furnace slag, the generator must:
 - 5.1.1. Prepare a written sampling plan which includes a description of sample preparation and storage procedures for the steel furnace slag.
 - 5.1.2. Undertake sampling and testing of the steel furnace slag as required under clauses 5.2 and 5.3 below. The sampling must be carried out in accordance with the written sampling plan and Australian Standard 1141.3.1-2012 Methods for sampling and testing aggregates – Sampling – Aggregates (or equivalent).
- 5.2. Where the steel furnace slag is generated as part of a continuous process, the generator must undertake the following sampling:
 - 5.2.1. Characterisation of the steel furnace slag by collecting 20 composite samples of the waste and testing each sample for the chemicals and other attributes listed in Column 1 of Table 1. Each composite sample must be taken from a batch, truckload or stockpile that has not been previously sampled for the purposes of characterisation. Characterisation must be conducted for steel furnace slag generated and processed during each 2-year period following the commencement of the continuous process; and
 - 5.2.2. Routine sampling of the steel furnace slag by collecting either 5 composite samples from every 10,000 tonnes (or part thereof) processed or 5 composite samples every 6 months (whichever is the lesser); and testing each sample for the chemicals and other attributes listed in Column 1 of Table 1 other than those listed as 'not required' in Column 3. Each composite sample must be taken from a batch, truckload or stockpile that has not been previously sampled for the purposes of routine sampling. However, if characterisation sampling occurs at the same frequency as routine sampling, any sample collected and tested for the purposes of characterisation under clause 5.2.1 may be treated as a sample collected and tested for the purposes of routine sampling under clause 5.2.2.
- 5.3. Where the steel furnace slag is not generated as part of a continuous process, the generator must undertake one-off sampling of a batch, truckload or stockpile of the steel furnace slag, by collecting 10 composite samples from every 4,000 tonnes (or part thereof) generated and testing each sample for the chemicals and other attributes listed in Column 1 of Table 1.

Chemical and other material requirements

- 5.4. The generator must not supply steel furnace slag to any person if, in relation to any of the chemical and other attributes of the steel furnace slag:
 - 5.4.1. The concentration or other value of that attribute of any sample collected and tested as part of the characterisation or the routine or one-off sampling of the steel furnace slag exceeds the absolute maximum concentration or other value listed in Column 4 of Table 1, or
 - 5.4.2. The average concentration or other value of that attribute from the characterisation or one-off sampling of the steel furnace slag (based on the arithmetic mean) exceeds the maximum average concentration or other value listed in Column 2 of Table 1, or

5.4.3. The average concentration or other value of that attribute from the routine sampling of the steel furnace slag (based on the arithmetic mean) exceeds the maximum average concentration or other value listed in Column 3 of Table 1.

5.5. The absolute maximum concentration or other value of that attribute in steel furnace slag supplied under this order must not exceed the absolute maximum concentration or other value listed in Column 4 of Table 1.

Notes

The EPA may amend or revoke this order at any time. It is the responsibility of each generator and processor to ensure it complies with all relevant requirements of the most current order. The current version of this order will be available on www.epa.nsw.gov.au

In gazetting or otherwise issuing this order, the EPA is not in any way endorsing the supply or use of this substance or guaranteeing that the substance will confer benefit.

The conditions set out in this order are designed to minimise the risk of potential harm to the environment, human health or agriculture, although neither this order nor the accompanying exemption guarantee that the environment, human health or agriculture will not be harmed.

Any person or entity which supplies steel furnace slag or blended steel furnace slag should assess whether the material is fit for the purpose the material is proposed to be used for, and whether this use may cause harm. The supplier may need to seek expert engineering or technical advice.

Regardless of any exemption or order provided by the EPA, the person who causes or permits the application of the substance to land must ensure that the action is lawful and consistent with any other legislative requirements including, if applicable, any development consent(s) for managing operations on the site(s).

The supply of steel furnace slag or blended steel furnace slag remains subject to other relevant environmental regulations in the POEO Act and Waste Regulation. For example, a person who pollutes land (s. 142A) or water (s. 120), or causes air pollution through the emission of odours (s. 126), or does not meet the special requirements for asbestos waste (Part 7 of the Waste Regulation), regardless of this order, is guilty of an offence and subject to prosecution.

This order does not alter the requirements of any other relevant legislation that must be met in supplying this material, including for example, the need to prepare a Safety Data Sheet. Failure to comply with the conditions of this order constitutes an offence under clause 93 of the Waste Regulation.

- 7.3. In cementitious mixes, the consumer can only apply blended steel furnace slag to land where it complies with a relevant specification or Australian Standard, or supply agreement.
- 7.4. In non-cementitious mixes, the consumer can only apply steel furnace slag to land where such application:
 - 7.4.1. complies with the relevant specification or Australian Standard, or
 - 7.4.2. complies with a supply agreement, or
 - 7.4.3. complies with a development consent that specifically considers the use of steel furnace slag or blended steel furnace slag, and
 - 7.4.4. is not applied in or beneath water, including groundwater.
- 7.5. The consumer must keep a written record of the following for a period of six years:
 - the quantity of any steel furnace slag and blended steel furnace slag received; and

application to land means applying to land by:

- spraying, spreading or depositing on the land;
- ploughing, injecting or mixing into the land; or
- filling, raising, reclaiming or contouring the land.

cementitious mixes mean either steel furnace slag or blended steel furnace slag which has been mixed with general purpose cement, lime and other activators for use in bound applications, where the materials must be chemically bound together.

consumer means a person who applies, or intends to apply, steel furnace slag or blended steel furnace slag to land.

Notes

The EPA may amend or revoke this exemption at any time. It is the responsibility of the consumer to ensure they comply with all relevant requirements of the most current exemption. The current version of this exemption will be available on www.epa.nsw.gov.au

In gazetting this exemption, the EPA is not in any way endorsing the use of this substance or guaranteeing that the substance will confer benefit.

The conditions set out in this exemption are designed to minimise the risk of potential harm to the environment, human health or agriculture, although neither this exemption nor the accompanying order guarantee that the environment, human health or agriculture will not be harmed.

The consumer should assess whether or not the steel furnace slag or blended steel furnace slag is fit for the purpose the material is proposed to be used for, and whether this use will cause harm. The consumer may need to seek expert engineering or technical advice.

Regardless of any exemption provided by the EPA, the person who causes or permits the application of the substance to land must ensure that the action is lawful and consistent with any other legislative requirements including, if applicable, any development consent(s) for managing operations on the site.

The receipt of steel furnace slag or blended steel furnace slag remains subject to other relevant environmental regulations in the POEO Act and Waste Regulation. For example, a person who pollutes land (s. 142A) or water (s. 120), or causes air pollution through the emission of odours (s. 126), or does not meet the special requirements for asbestos waste (Part 7 of the Waste Regulation), regardless of having an exemption, is guilty of an offence and subject to prosecution.

This exemption does not alter the requirements of any other relevant legislation that must be met in utilising this material, including for example, the need to prepare a Safety Data Sheet (SDS).

Failure to comply with the conditions of this exemption constitutes an offence under clause 91 of the Waste Regulation.
