of the State of

New South Wales

Number 357–Mining and Primary Industries

Friday, 4 December 2020

The New South Wales Government Gazette is the permanent public record of official NSW Government notices. It also contains local council, non-government and other notices.

Each notice in the Government Gazette has a unique reference number that appears in parentheses at the end of the notice and can be used as a reference for that notice (for example, (n2019-14)).

The Gazette is compiled by the Parliamentary Counsel's Office and published on the NSW legislation website (www.legislation.nsw.gov.au) under the authority of the NSW Government. The website contains a permanent archive of past Gazettes.

Biosecurity (Serpentine Leafminer) Control Order 2020

under the

Biosecurity Act 2015

I, SATENDRA KUMAR, Director, Plant Biosecurity and Product Integrity, Biosecurity and Food Safety Branch, Department of Primary Industries, Regional NSW, with the authorisation of the Minister in pursuance of section 78 of the *Biosecurity Act 2015* (“the Act”) and pursuant to Part 6 of the Act, reasonably believing that this order is necessary to minimise or manage the biosecurity risk arising from the presence, spread or increase of the pest serpentine leafminer within the State, make the following control order.

Dated this 26th day of November 2020

SATENDRA KUMAR

Director Plant Biosecurity and Product Integrity
Department of Primary Industries
(within Regional NSW)

1 Name of control order

This control order is the *Biosecurity (Serpentine Leafminer) Control Order 2020*.

2 Commencement

This control order commences on the date on which it is published on the Department’s website.

3 Duration of control order

This control order has effect for 6 months from the date of commencement.

4 Definitions

In this control order:

approved insecticide means a treatment that is approved by the APVMA or is a registered product for use on serpentine leafminer.

Note: A list of permits approved by the APVMA and registered products for the management of SLM is available on the website of the Department of Primary Industries.

APVMA means the Australian Pesticides and Veterinary Medicines Authority.

infested premises means premises that the person in charge knows, or ought reasonably to know, contains SLM host plants that are showing visible signs of leafminer damage.

leafminer damage means trails or ‘mines’ that can appear as light green to white winding trails or patterns on the surface of leaves or pods of a SLM host plant.

person in charge, in relation to premises, includes:

- (a) the owner of the premises,
- (b) a person who has the premises in their possession, care, custody or control.

serpentine leafminer or **SLM** means the pest of the species *Liriomyza huidobrensis*.

SLM Control Zone – see clause 6.

SLM host plant means any plant belonging to a species specified in the Schedule and includes any part of such a plant.

SLM host potted plant means a SLM host plant that is being grown or raised in a pot, seedling tray or other container.

the Act means the *Biosecurity Act 2015*.

5 Biosecurity matter and biosecurity risk [s63(a)]

- (1) The biosecurity matter to which this control order relates is serpentine leafminer.
- (2) The biosecurity risk to which this control order relates is the risk of an adverse effect on the economy and the community that arises from the presence, spread or increase of serpentine leafminer within New South Wales.

6 SLM Control Zone – Whole of NSW [s63(b)]

- (1) The control measures specified under this control order apply in relation to the whole of New South Wales.
- (2) The control zone is called the **SLM Control Zone**.

7 Regulation of movements out of infested premises in the SLM Control Zone [ss63(d), 68, 69(c) and (e)]

- (1) A person in charge of an infested premises in the SLM Control Zone must ensure that a SLM host plant is not moved out of the infested premises unless one of the following control measures has been carried out:
 - (a) the SLM host plant has been inspected and is not showing any visible sign of leafminer damage, or

- (b) the SLM host plant has been treated in one of the following ways:
 - (i) in the case of a SLM host potted plant – by saturation spraying by applying (by the method of spraying) an approved insecticide in accordance with all label directions or APVMA permit conditions for the treatment of SLM on all exposed parts of the SLM host potted plant (including the trunks, stems, leaves, buds, flowers, fronds and other isolated parts) to the point of run-off,
 - (ii) in the case of all other SLM host plants:
 - (A) treated with an approved insecticide in accordance with all label directions or APVMA permit conditions for the treatment of SLM, or
 - (B) treated with methyl bromide fumigation at the rate of 32 g/m³ for 3 hours at 21°C.
- (2) This clause does not apply in relation to any of the following parts of a SLM host plant:
 - (a) any fruit or vegetable (other than edible seed pods of peas (*Pisus sp.*) and beans (*Phaseolus sp.*)) that does not have any leaves attached to it,

Notes:

 1. Like the leaves of SLM host plants, edible seed pods of peas and beans can be infested with SLM and show SLM damage and so are subject to the control measures in subclause (1).
 2. Leaves that are attached to fruit and vegetables of SLM host plants are subject to the control measures in subclause (1).
 - (b) any roots or trunks that do not have any leaves attached to them,
 - (c) any grain, seeds, corms or tubers,
 - (d) any flowers that do not have any leaves attached to them,
 - (e) a part of the SLM host plant that has been processed, including by being cooked, dried, canned, juiced or pickled,
 - (f) a part of the SLM host plant that has been prepared as hay or silage,
 - (g) a part of the SLM host plant destined for waste or recycling by deep burial or composting.
