Water Notices

STATE OWNED CORPORATIONS ACT 1989

Direction to the Board of Water NSW

Notice of Reasons for Giving the Direction

I, the Minister for Water, Property and Housing, with the approval of the Treasurer, issued a Direction under section 20P of the *State Owned Corporations Act 1989* to Water NSW on 13 May 2020 ('the Direction').

The severity of the current drought and the significant water security issues for large parts of regional NSW constitute exceptional circumstances and in my view it was necessary for me to direct WaterNSW in the public interest under section 20P of the *State Owned Corporations Act 1989*, to advance planning and early works for the following projects:

- a. raising the Wyangala Dam wall;
- b. constructing a new Dungowan Dam and upgrading the Dungowan pipeline; and
- c. investigating a new Mole River Dam.

The northern and far western valleys in NSW, in terms of inflows, are now experiencing the worst drought on record.

The current drought situation in the Lachlan Region is now officially the most severe on record. The Lachlan and Belubula Rivers have experienced stage 3 severe drought and there have been unprecedented water shortages in many towns in the region. Increasing the capacity of the Wyangala Dam by raising the dam wall will ensure the long-term water security for towns including Cowra, Forbes and Parkes and provide flood mitigation for the Lachlan Region.

There are growing risks in relation to water security in the Namoi region, particularly with regard to town water supplies for Tamworth and water access along the Peel Valley. Drought conditions have been severe in the Namoi region, with Stage 4 drought conditions in the Peel valley, and Stage 3 drought conditions in the Upper and Lower Namoi. Constructing the new Dungowan Dam and upgrading the Dungowan pipeline will secure town water supplies for Tamworth, support population growth and improve water security for the region.

In the case of both the Wyangala Dam project and the Dungowan Dam and pipeline project, the Direction will ensure that business cases are prepared, and pre-construction activities carried out, so that the projects are brought to a stage where they are ready for construction as soon as possible. In addition, given the exceptional economic circumstances at present arising from both the severe drought and the COVID 19 pandemic, accelerated early works that are possible for the Wyangala Dam project and Dungowan pipeline will support job growth in those regions which is also in the public interest.

The Border Rivers' economy is heavily dependent on agriculture. Low reliability of water supply is eroding on-farm productivity and is a significant issue for the region. Investigations will consider the potential for a Mole River dam to improve the reliability of water supply and other possible benefits such as mitigation of flood damage. This direction will ensure that the necessary investigations are prepared and assured in a timely manner.

This notice is published under sections 20P(5) and (6) of the *State Owned Corporations Act 1989*.
