

Government Gazette

of the State of
New South Wales

Number 60 - Electricity and Water Wednesday, 19 February 2025

The New South Wales Government Gazette is the permanent public record of official NSW Government notices. It can also contain local council, non-government and other notices.

Each notice in the Government Gazette has a unique reference number that appears in parentheses at the end of each page of the notice and can be used as a reference for that notice. For example, [NSWGG-2024-10-1].

The Gazette is compiled by the Parliamentary Counsel's Office and published on the NSW Government Gazette website (www.gazette.nsw.gov.au) under the authority of the NSW Government. The website contains a permanent archive of past Gazettes.

To submit a notice for gazettal, visit the website.

Australian Energy Regulator

Contribution Determination for 2025-26

- 1. On 12 November 2021, the Australian Energy Regulator (AER) was appointed as a Regulator under the *Electricity Infrastructure Investment Act 2020 (NSW)* (the EII Act).
- 2. Under section 56 of the EII Act, the AER is required to make an annual contribution determination in which it determines the amount that is required for the Scheme Financial Vehicle to be able to make payments from the Electricity Infrastructure Fund (the Fund) that are required under the EII Act, including an amount for the Scheme Financial Vehicle to meet its liabilities as they fall due.

AER's Contribution Determination

- 3. On 7 February 2025, the AER made the following contribution determination under section 56(1) of the EII Act.
 - a. The total contribution amount for 2025–26 is \$493.18 million.¹
 - b. The minimum prudent cash balance target for 2025–26 is \$269.10 million. As the Fund will recover a minimum prudent cash balance of \$213.98 million in 2024–25, the Scheme Financial Vehicle must recover an adjustment of \$55.12 million in 2025–26 to reach the target level.
 - c. The amounts required to be paid by each NSW Distribution Network Service Provider (DNSP) are:
 - i. Ausgrid \$212.77 million.
 - ii. Endeavour Energy \$184.71 million.
 - iii. Essential Energy \$95.70 million.

Details of how the contribution determination was made

- 4. The AER made this contribution determination in accordance with the process and methodology set out in its Contribution Determination Guideline (Guideline).²
- 5. The methodology the AER applied in making this contribution determination is set out in its Contribution Determination Model (Model).³
- 6. Schedule 1 shows a public version of the completed Model and contains the underlying data inputs provided by the NSW scheme entities. The AER used these data inputs to calculate the contribution determination amounts. In line with the process set out in the Guideline, the AER undertook a quality assurance check of all data provided.

¹ This number is rounded to two decimal places, but please note that the unrounded number will be implemented.

² https://www.aer.gov.au/industry/registers/resources/guidelines/nsw-contribution-determination-guideline

³ As above

⁴ The public version of the contribution determination model contains limited data. This is because much of the data underlying the AER's contribution determination relates to ongoing competitive tender processes. These processes could be compromised if the data were published. However, we intend for this data to be published once it becomes historical and no longer relevant to ongoing tender processes.

Matters taken into account

7. In making a contribution determination, the AER must take into account the matters listed in clause 35 of the *Electricity Infrastructure Investment Regulation 2021 (NSW)* (EII Regulation). Table 1 summarises how the AER took these matters into account.

Table 1

| Matters listed in regulation 35 | How the AER has taken the matter into account | | | | | | | |
|---|---|--|--|--|--|--|--|--|
| 35(1)(a) the need to limit variability in contribution determinations from year to year, | The AER's methodology, as set out in the Guideline, ⁵ manages variability by applying a 3-year rolling average of net costs. ⁶ | | | | | | | |
| (b) the equitable allocation of the contribution determination between distribution network service providers based on each provider's— (i) volumetric energy delivery in the previous financial year, and (ii) peak demand in the previous financial year, | The AER's methodology for apportioning costs across NSW DNSPs is set out in the Guideline and is based on volumetric energy and peak demand metrics. ⁷ This methodology apportions the costs of long-term energy service agreements on an energy delivered metric basis, and all remaining costs elements on a peak demand metric basis. | | | | | | | |
| | The AER's methodology, set out in the Guideline, ⁸ addresses this issue in the following ways: | | | | | | | |
| | • The contribution determination reflects the Scheme Financial Vehicle's forthcoming liabilities in that it is based on a 3-year rolling average of forecast net costs. | | | | | | | |
| | Each scheme entity provided the AER with estimates of costs under its responsibility for 2 leading years and 1 lagging year. | | | | | | | |
| | This captures the costs of long-term energy service agreements, payments to network operators and the administration costs of scheme entities.⁹ | | | | | | | |
| | • The contribution determination includes a minimum prudent cash balance allowance, which is required under section 56(3)(a) of the EII Act. | | | | | | | |

⁵ AER, *Contribution Determination Guideline*, August 2024, chapter 3.

⁶ AER, *Contribution Determination Guideline*, August 2024, chapter 5.2.

⁷ AER, *Contribution Determination Guideline*, August 2024, chapter 5.4 and 5.5.

⁸ AER, *Contribution Determination Guideline*, August 2024, chapter 3.

⁹ AER, *Contribution Determination Guideline*, August 2024, figure 1.

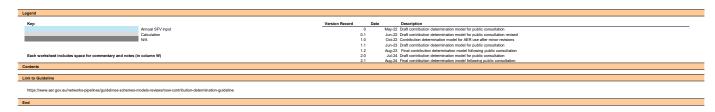

| Matters listed in regulation 35 | How the AER has taken the matter into account | | | | | | | |
|--|---|--|--|--|--|--|--|--|
| (d) information provided to the regulator by the consumer trustee, the financial trustee, the infrastructure planner or the Tribunal | The AER made its contribution determination using data provided by the NSW scheme entities and NSW DNSPs. | | | | | | | |

Consultations with the Financial Trustee

8. In making its contribution determination, the AER consulted with the Financial Trustee as required by section 56(6)(a) of the EII Act.
